oldi Cable to THE NEW YORK HERALI New York Herald Bureau. | Berlin, Nov. 4.

German ultranationalists see in the Fascista victory proof of the incapacity of democratic party gov ernment and view it as a victory for the policy of force. Nationalists and ders conferred with Benito Mussolini last spring in an effort to the tactics of the Fascisti. They also discussed with him the reasons for the failure of the Kapp rebellion.

THE NEW YORK HERALD correspond-ent attended a recent meeting of Gernationalists and secret military organizations in Innsbruck, where a theme to organize a German force along Fascista methods was approved while the Germans at the same time measures to assist the Fasci in

An officer who accompanied Gen. Ludendorff to this gathering told THE NEW YORK HERALD correspondent that "the Italian uprising proves the futility of the fiddling methods of parliaments and marks the beginning of their abolishment throughout Europe. Germany needs a strong military dictatorship to Bolshevism and restore order suppress Bolshevism and restore order. The question of a monarchy is secondary, because even a wise King could not change the hard times. Gen. Ludendorff has said that he sees the need for a strong dictatorship in Germany, but with Prench approval, and one whose efforts will be directed against Bolshev-

not fighting enemies abroad. Herr Sittler, head of the Bavarian factionalist socialists, has an organization which is the largest in Germany, with 80,000 members who. Ilke the Fascisti, have an aversion for Parliament, their supporters refusing even to hold office. He also favors the formation of a national army. "The formation of a substantial middle class force is essential," he says.

The underlying idea of the German se-ret military organizations is one day to evenge themselves against France Vhether the German nationalists or scisti have an equal chance of success Germany is doubtful, because the al control and the organizations are pled by inner factional differences, so-called factionalist socialists are the republic, while the other bands are conspicuously monarchistic. There is a chance for reconciliation, however through a program of a strong military dictatorship and the abolition of democracies and parliaments.

New York Herald Bureau. | Paris, Nov. 4. No more adverse criticism of the peculiar familiarity and spirit of equality that France has developed among her black colonials, please! Some day, when the nonwhite population reaches a numerical superiority which cannot be defeated by recourse to war. France may become the savior of the world. At least, that is the novel suggestion, being propounded by Albert Sarraut, one of the French delegates at the Washington conference.

M. Sarraut foresees no possibility of the French colonials trying to separate from the motheriand, but on the contrary finds an evident movement for greater cohesion, with the colonials taking a greater share in their own government.
